

Instant Merchant Onboarding

Integrated Solutions FOR SMART BUSINESS

- > Direct merchant uploading eliminates traditional onboarding times of 24-28 hours.
- > Connect API connects to all MIDs and assign gateway and processor ids for 1-1 alignment.
- > Add merchant products and details to include in the AI response packet analysis.

Merchant Lists

- > **Save Time**
Your list can directly be uploaded which will save time from another entity preparing your merchant data.
- > **On demand responses**
Chargebacks can be responded to as soon as the merchant is connected by selecting API sync.

The ability to upload entire lists of merchants is one of the compelling features that separates us from the competition. The guided onboarding process will ensure new MIDs are upload and ready for dispute responses the moment they are connected.

Shared Cloud

Use your API connections to the following cloud applications to easily upload your merchant lists. After the lists are loaded drag and drop the column headers to the data points.

- > **Google Sheets**
Most popular source for cloud sheets used by merchants. Copy the sheet id to load the list.
- > **Airtable**
The Api Key, Base Name, and Secret is needed to connect your Airtable Bases.
- > **Excel**
Traditional spreadsheets work just as well when upload merchant lists, xls and xlsx formats.
- > **Chargebacks Online**
Use the merchant onboarding tool to quickly add a new MID to respond to chargebacks.

Results

Onboard merchant's faster and respond using intelligent reason code analysis using the available merchant data. See for yourself how fast and efficiently chargebacks are managed and responded.
